WORK EXPERIENCE

finAPI

Senior software developer / Software architect

04/2019 - Present Munich, Germany

SaaS provider, aggregates and analyses financial data

Achievements/Tasks

- Was directly involved in the development of the API that is currently the main product of the company. In the course of this, I was engaged in both designing the public REST API, and also developing internal components of the system and their interaction with each other.
- Led the integration with more than thirty APIs provided by different banks across Europe in accordance with the PSD2 directive.
- Was a lead developer on a brand-new product that included a REST API (Java & Spring Boot) as well as the user interface (TypeScript & React). Established the architecture of the product, actively participated in the development part, helped with customers onboarding.
- Currently responsible for extending the country coverage of the main company's product.

Reliable Systems

Middle/Senior software developer

11/2012 - 04/2019 Penza, Russia

Outsourcing company

Achievements/Tasks

- Worked in an outsourcing company on a few long-term projects. The first one was a Spring web application with the UI implemented with ExtJS. Another project was a pure Spring REST application with extensive data processing.

Setup

Junior software developer

06/2010 - 12/2012 Penza, Russia

Achievements/Tasks

- As a working student, was engaged into development of a few rich web portals (contract-based development). Used technologies: Java EE 6, JSF 2.0, PrimeFaces, MySQL, Oracle DB.
